[🐦 oumguido](#) [🌐 GuidoBR](#)

I write about software development, technology, Web and books on my personal blog. I work as a software engineer and my goal is to help improve people's lives. I have experience developing web apps as a full stack developer, working with agile methodologies, creating software with tests and using version control systems. I'm currently studying Computer Science at UERJ (Rio de Janeiro - Brazil). My main interests are Functional Programming, Data Science and Finance.

SKILLS

Web Development

html | css | javascript | angularjs

Programming

python | php | go | nodejs

Cloud

heroku | aws | google app engine |

WORK EXPERIENCE

Software Developer at Stone Pagamentos

November 2016 - Current

<http://www.stone.com.br/>

Golang / NodeJS / AngularJS / Fullstack

- Developed a product that made the company achieve it's revenue goal
- Designed Restfull APIs using Go
-

Software Developer at Anchor Loans LP

August 2015 - November 2016

<https://www.anchorloans.com/>

At Anchor Loans, I developed a crawler to get information on thousands of real state properties and use this information to help investors spot great opportunities. Here I work remotely with a great team from different places and we share a lot of information and knowledge.

- Full-time remote work for an American company.
- Created data scrapping software
- Developed products using Python / Pyramid and MongoDB
- Made the sysadmin live easier with an integration with Amazon's EC2

Software Developer at perspectiva.in

January 2015 - January 2015

<http://www.perspectiva.in/>

Development of a SaaS solution to automatize the social interaction between business and clients. PHP, Yii2, PostgreSQL and MongoDB

- Integration with Instagram's API, allowing our customers to perform batch social operations
- Creation of maps with geolocalized data leading our customers to better meet their needs.

Software Developer at Fidelize

August 2013 - October 2015

<https://site.fidelize.com.br/>

Development of EDI software to deal with our clients bussiness needs. PHP / Yii

- Succesfully developed and delivered a crawler that boosts the client's productivity in dealing with orders.
- Integration with SugarCRM, reducing response time of the client relationship team
